

## What is a makerspace?

A makerspace is a place where students can gather to create, invent, tinker, explore and discover using a variety of tools and materials.

## What does this have to do with my classes?

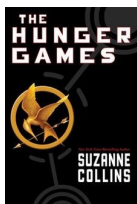

Classes can visit the makerspace for project based learning. Materials and space for students to work on projects will be available.

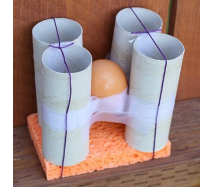

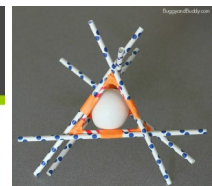

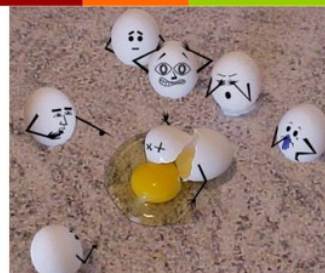

### Novel Engineering

Students are tasked with a problem faced in a story read in class and work in groups to prototype a solution.

You are a tribute in the Hunger Games. How can you reach the supplies in the Cornucopia without getting blown up in the minefield?

### The Egg Drop Challenge

**The makerspace has great opportunities for clubs and student organizations too.**
